## 03

## SPRINT

Since 3 weeks determined to do the prototype as it shows in the chart each sprint had one week duration.

Three weeks divided into 3 different sprints (Document, Design, Implant) each one of them had different processes

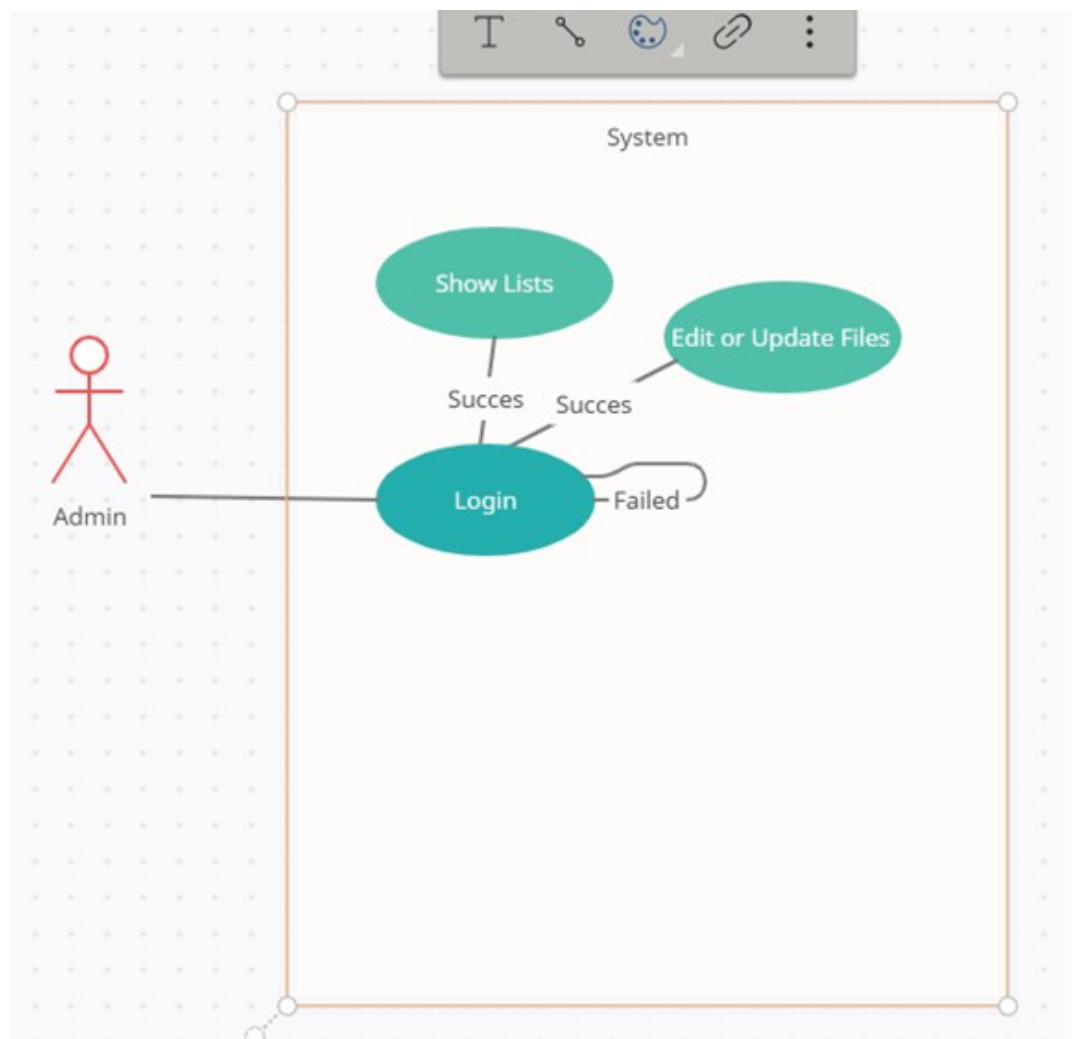

## PRODUCT CAPABILITY

This product will make an easy display of the information and editing the information of the academy datas

## 04

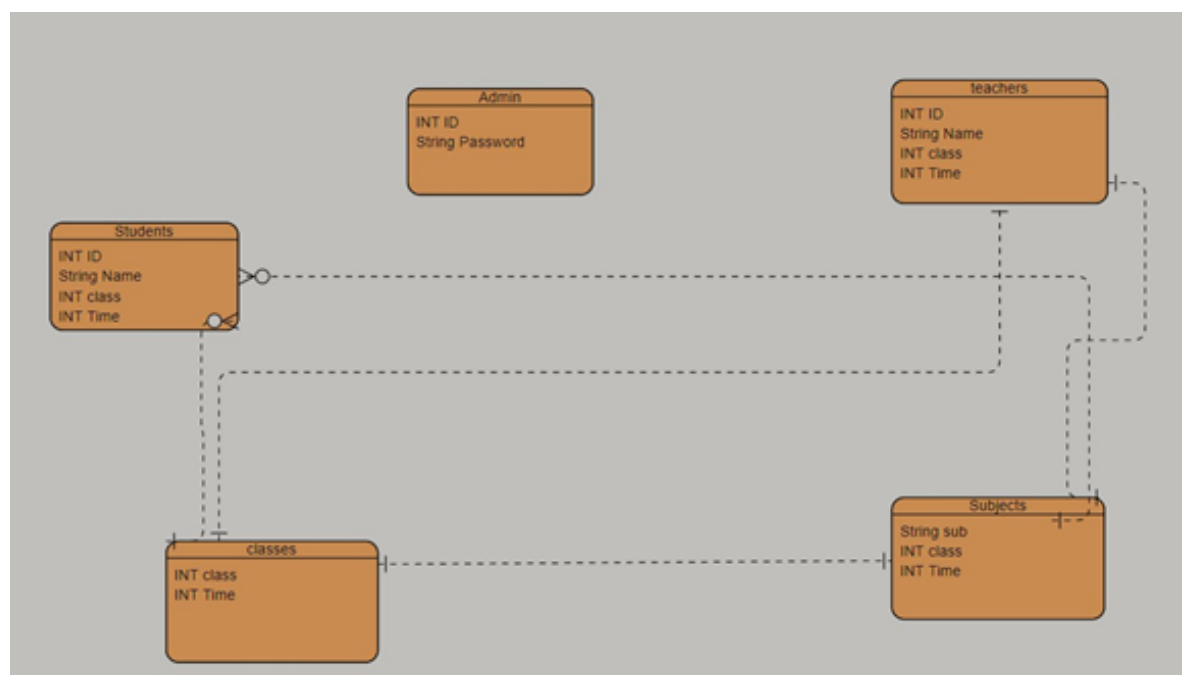

## USER INTERACTIONS

All of interactions happened in this product showed in this use case diagram

## 05

## ER DIAGRAM

## APPEARANCE

The program will appear on web browser in pages form

## DATA STRUCTURE AND ALGORITHM

There is not much data structure used in this program or algorithm because there no sort or search or even store data it straight forward program

# 06

## WHAT MAKES IT GOOD?

- This program will make the display of academy data more ease
- Multi-Function
- Secure
- Easy to use.
- Maintain
